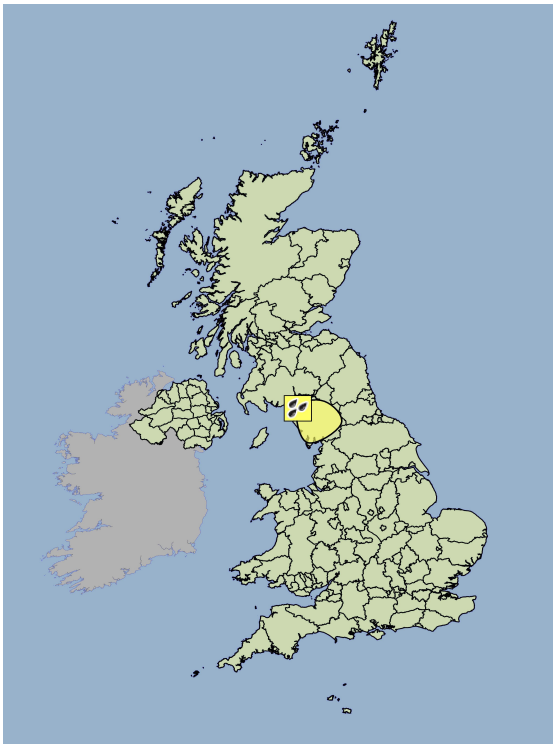
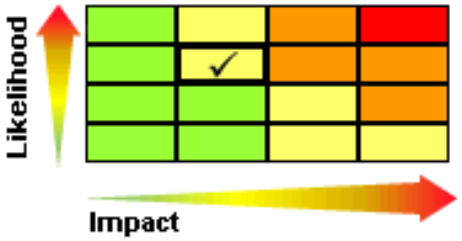
National Severe Weather Warning Service





Chief Forecasters Assessment
An active cold front will move southeastwards across the area bringing some prolonged rain followed by a brief, intense burst late afternoon or early evening. Whilst river flooding is not expected, 20-40 mm on top of saturated conditions are likely to lead to surface water flooding. Southerly winds will touch gale force over coasts and hills.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **11:00 on Fri, 05th Feb 2016** until **20:00 on Fri, 05th Feb 2016**

Persistent rain will turn heavy at times on Friday over Cumbria. Please be aware of the risk of local surface water flooding.
